What is BYOD?

- BYOD = Bring Your Own Device
- BYOD is a policy allowing students to use personal computing devices, such as smartphones, tablets, laptops, and readers in school in order to assist with schoolwork.
- Any devices used at school must be Wi-Fi capable.
- Students must use devices only with teacher permission for a specific instructional purpose.
- Consult the documentation under the BYOD link of the Luther Jackson Middle School website for more information.
