Dear Fellow RAMs,

Robinson’s Secondary Math Department would like to invite your student to register for and attend one of our Math Boot Camps this summer. These *three-hour* sessions for *4 days* will help students refine fundamental prerequisite math skills needed to be successful in the math course in which they are enrolled for the *upcoming school year*. As you know, high-school mathematics courses are extremely challenging, and our Math Boot Camp will help alleviate some of the pressures these difficult courses may create.

Math Boot Camp sessions are 9 am to noon on Monday thru Thursday, 22 -25 August, 2016 at Robinson Secondary. The cost of the camp is $100.00 per student. **Registration ends on June 20. There will be scholarship opportunities for students who demonstrate financial need.**

Sessions are offered for students rising to Algebra 1, Geometry, and Algebra 2. Students will be working in small group settings with multiple teachers. Hands-on activities using a variety of resources are planned to help students develop their understanding of math fundamentals. Snacks will be provided for the students, though transportation to and from school is not provided. We encourage students to have their own TI-84+ calculator for Math BootCamp (and next year’s math course!), but we will have them available for students to use if necessary. Please feel free to contact Mr. Evans at the email contact below with any questions.

If you are interested in taking advantage of this low-cost way to give your student an edge in math this year, please register on line at [https://goo.gl/KJn5Wd](https://goo.gl/KJn5Wd) or by opening the form at the QR code below. Payment will be collected by PayPal, using the instructions provided. **Registration closes Monday, 20 June. We will mail verification of your student’s participation to your address by mid-July with directions and locations for daily drop off and pick up. An Emergency Care form will be required for every student.**

Sincerely,

Jim Evans, Chair, Robinson Secondary School Math Department
